

SET Checking

for hospitals

an unique service
for hospitals

Benefits for the hospital

- ◆ Complete **inventory control** and **evaluation** of the existing instrument sets and instrument stock
- ◆ Identification and status evaluation of **every single instrument**
- ◆ Recommendations for **improvement** of the instrument sets based on facts
- ◆ Final analysis with complete **standardised set lists** for all instrument sets
- ◆ Exact **financial planning** due to exact figures of the condition of the surgical instruments
- ◆ Service includes **training** and **formation** for CSSD staff

The Instrument Guys

Project kick off:
members of administration,
operation theatre, CSSD and
hygiene department meet with
the service provider

- ◆ Definition of the range of sets / medical departments which shall be checked
- ◆ Definition of the set checking criteria
- ◆ Date of the set checking
- ◆ Definition of the working location (constant supply of instrument set is necessary)
- ◆ Preparation of the existing set lists if those are available
- ◆ Specification of the future numbering system

Installation meeting:
one day before the start

- ◆ Involved persons of the hospital will be informed that the service starts
- ◆ Working stations will be prepared in the defined work place
- ◆ A contact person from the hospital who is authorized and prepared to answer the questions of the service provider needs to be available
- ◆ Make sure there is a constant set supply

Plan of action

Within the hospital: during the set checking service

- ◆ 100 % check - every instrument is evaluated
- ◆ Check of the instruments in stock and single packed instruments
- ◆ Results are documented in the set checking software
- ◆ Weight control of complete sets and containers
- ◆ If agreed during the preparation phase of the set checking service: reorganisation and standardisation of the set content in cooperation with the hospital staff (contact person) on demand
- ◆ Digital photos of every set for top quality set lists

After service: after the set checking service

- ◆ Elaboration of the instrument analysis, set lists and offers for instrument exchange and instrument repair by the service provider according to the defined project conditions
- ◆ Presentation of the analysis in the hospital
- ◆ Definition of the time schedule for renewing the sets
