3<sup>rd</sup> Course:

**PRESTO - Identity Preserving  
Facelift Technique**  
Preserving of the retaining  
ligaments & the SMAS tethering

**medicon®**  
**Courses**

in Cooperation with:  
Clinic Dr. Funk, Munich, Germany

Dear colleagues,

Producing youthful facial appearance by face-lifting often comes along with an undesired loss of a patient's individual phenotype characteristics. This may result from insufficient preservation of retaining ligaments, the "dynamic guardians of facial identity" and from complete severance of the intersegmental connections of the superficial musculo-aponeurotic system (SMAS) which tether, structure and compartmentalize facial soft tissue into defined, cosmetically relevant anatomical zones.

How to do deep plane rhytidectomy easy, save fast and protecting the personal identity?

Keywords:

- Identity
- Rhytidectomy
- SMAS technique
- Retaining ligaments
- Facelift
- Aesthetic surgery

With kind regards,  
Dr. Dr. Wolfgang Funk

Clinic Dr. Funk, Munich, Germany
