## Medicon eG expands company headquarters

As part of the corporate development strategy of the surgical cooperative Medicon eG, Tuttlingen, the company decided in December 2018 to purchase the former "Comeg" building at Dornierstrasse 55 in Tuttlingen.

Medicon eG is currently concentrating on centralizing essential core processes in the areas of logistics and production and thus making them more efficient. The medium-term investment volume for this is approx. 6 million euros.

With process-optimized structures, Medicon eG will continue to grow and at the same time shoulder the demands that the new MDR (Medical Device Regulation) will place on all companies in the medical technology sector from 2020 onward.

The cooperative association of 9 medium-sized medical technology companies from the Tuttlingen area was founded in 1941. The company has always attached great importance to its product philosophy "Made in Germany". The investments currently being made strengthen Medicon eG's commitment to Germany as a business location and, in particular, to Tuttlingen as a manufacturing location.

The network deals with the manufacture, development and worldwide distribution of medical technology products such as surgical instruments, container systems, motor systems and implants for oral and maxillofacial surgery and spinal surgery.

## **New App available - Medicon Catalogues**

**medicon**<sup>®</sup>  
Catalogues

This app allows you to combine the convenience of a printed catalogue with the amenities of a mobile device to view the full catalogue range of the Medicon divisions SURGICAL, CMF and NEURO+SPINE.

- Within seconds. Find everything you want to know about the Medicon products with the search function and table of contents in each catalogue.
- Stay up to date. Get the latest catalogue issues within a short time.
- Uncomplicated and intuitive. Choose your preferred language.

Further Information »

**Medicon Course PRESTO ? Identity Preserving Facelift Technique ? Preserving of the retaining ligaments & the SMAS tethering**

Our **Medicon Course PRESTO** took place for the first time from June 22 ? 24, 2017 at the Clinic Dr. Funk ? Clinic for Plastic, Aesthetic, Cosmetic and Reconstructive Surgery in Munich. The course was of great interest and fully booked already several weeks prior to the start of the course.

During the course, 12 participants had the chance to learn about the **facelift technique PRESTO** developed by Dr. Dr. Funk, owner and head physician of the Clinic Dr. Funk. This is a **new, vascular- and soft tissue-saving** surgical technique, requiring less time than conventional techniques. The soft tissue spreader PRESTO which has been developed by Dr. Dr. Funk in cooperation with Medicon is perfectly suitable for carrying out this surgical technique. You will find detailed information about the product via the following link:

<http://www.medicon.de/en/products/surgical/plastic-surgery/facelifting/soft-tissue-spreader-presto-for-the-atr>

In the beginning of the two-day course Dr. Dr. Funk familiarized the participants with the **theoretical basics** of facelifting and the surgical technique PRESTO. The subsequent surgical case offered the participants a detailed insight into this reliable and proven surgical procedure. During the hands-on workshop, all the participants had the chance to **make practical use** of the newly acquired knowledge, to **exchange experiences** and to profit from **individual feedback** of Dr. Dr. Funk.

We would like to thank all participants ? also on behalf of Dr. Dr. Funk ? for the great cooperation, positive feedback and the very successful course!

If you are interested in attending one of our intensive high-grade trainings, please do not hesitate to contact us. We are pleased to inform about our Medicon Courses offered in the disciplines of Plastic Surgery, Cranio-Maxillofacial Surgery, Spine Surgery and ENT Surgery! #### **German Design Award - Special Mention for the product line ?Medicon?.DieBLAUEN.Comfort?**

The product line ?Medicon ?DieBLAUEN. Comfort? has been honored at the German Design Award 2017 with a ?Special Mention for Excellent Product Design?.

The German Design Award is an award which honors innovative products, their manufacturers and designers, who have made pioneering contributions of the German and International design

landscape. The highly esteemed, international jury of experts guarantees this.

Criteria like degree of innovativeness, functionality and operability, user-friendliness, technical quality and function, just to name a few, are deciding factors for the jury.

### **Innovation Award Baden-Württemberg for the expandable vertebral body replacement ?mediExpand®"-Cervical**

In 2015 our "mediExpand®"-Cervical was nominated by the jury of the innovation award Baden-Württemberg. The expandable vertebral body replacement became one of the ten finalists and received a "special recognition of exemplary achievement".

The innovation award Baden-Württemberg, also known as "Dr.-Rudolf-Eberle-Award", is annually awarded to small or medium-sized companies in industry, trade and technological services.

Criteria like technical innovation, outstanding entrepreneurial performance and sustainable economic success are evaluated by the jury. Only those products that meet all three criteria reach the finals and therefore have a chance to be awarded.
